## CATALOGUE

“L” before the Herd Book number indicates Pedigree Luing Male. “P” indicates Pedigree Luing Female. “A” indicates Appendix “A” Female. “B” indicates Appendix “B” Female. [P] After family name indicates: the animal is polled. “P/12345\*” indicates dam classified, and L/12345# indicates that the sire has passed a breed inspection. “SV” after the name indicates that the animal has been sire verified by DNA hair sample. All bulls entered have been inspected by the Fieldsman.

## CONDITIONS OF ENTRY

1. The Sale is conducted under the “General Conditions of Sale” which are exhibited in the Market and in accordance with the Regulations as approved by The Luing Cattle Society Limited.
2. Please note: Stock will be sold as they appear in the ring. Any prospective buyer wishing to purchase one of a pair must consult the

vendor prior to them entering the ring to see if they are prepared to sell them as singles.

- 3. All bulls will be subject to the Society's upset price of 2,000gns.**
4. There will be no transfer fee for bulls or heifers bought at official Society Sales.
5. All Luing Cattle Society Sales are conducted under the National Beef Association terms and conditions of sale incorporating bull breeding and female breeding warranties. To cover the cost of the warranty service detailed on the following page, a charge of £4.00 + vat per bull and £2.00 + vat per female will be split equally between purchaser and seller, applied by the Auctioneer at the point of sale.
- 6. Levy of 2% to the Luing Cattle Society. The sale will be conducted in guineas.**

### HEALTH INFORMATION

Since 2010 all official Luing Cattle Society Sales are run under the same health rules and are therefore BVD-safe. All stock must come from herds which are members of a CHeCS approved health scheme and are either BVD accredited free or the sale stock have tested virus negative. Additionally all stock forward are vaccinated against BVD. For herds testing for Johne's, the Risk Level categories are displayed and are defined as follows:

Status	Level
Risk Level 1	This is directly equivalent to the previous CHeCS Accredited Free status. Level 1 status is associated with the lowest risk source when buying in stock. Health plan required.
Risk Level 2	Herds with level 2 status have had one or two clear consecutive herd tests. Health plan required.
Risk Level 3	Herds with level 3 status have reactors identified at the annual herd test, but these are no more than 3% of animals tested. Health plan required.
Risk Level 4	Herds with level 4 status have reactors identified at the annual herd test, and this amount to more than 3% of the animals tested. Health plan required.
Risk Level 5	Any herd that is not carrying out the required testing or does not have a suitable health plan in place falls into this category. Level 5 status is considered to be the greatest risk source when buying in stock.

Please note: The Luing Cattle Society accepts health information supplied by the breeder/vendor as being accurate and all responsibility for the accuracy of such information lies with the breeder/vendor and not with the Luing Cattle Society.

## **NBA BREEDING WARRANTIES**

The following points should be noted:

### **Bull Breeding Warranty**

Each bull is sold with the warranty by the vendor that it is capable of getting stock by natural service. This shall be deemed to be fulfilled as soon as six females or 50% of the herd (whichever is the lesser number of the animals put to the bull) are in calf to the bull by natural service subsequent to the sale. The trial period is six months from date of sale or within 6 months of attaining the age of 14 months, whichever is the later.

### **Female Breeding Warranties**

Maiden Heifers: Every maiden heifer over the age of twelve months at the date of sale is sold with warranties by the Vendor

- That it shall be fertile up to the age of twenty-eight months
- That it is not in calf

Females in Calf: Every cow or heifer stated in the Sale Catalogue or by the Auctioneers at the time of the sale to have been served on a date not less than twelve weeks before the date of the sale is sold with warranties by the Vendor

- That it is in calf
- That it is in calf to the bull described in the Sale Catalogue, or by the Auctioneers at the time of the sale
- That the expected calving date will be within a period of 263 to 303 days of the service date

Females with veterinary surgeon's certificate of positive pregnancy diagnosis: Scanning is a matter of opinion and not a warranty. Every cow or heifer stated in the Sale Catalogue or by the Auctioneer at the time of the sale to be sold with a Veterinary Surgeon's certificate of positive pregnancy diagnosis is sold with the same warranties by the Vendor as described for Females in Calf (above). Please note time limits below.

### **Claims and Time Limits**

A claim by a purchaser will only be valid if the purchaser has given notice in writing to the Auctioneers of the intended claim with following time limits:

Bull - Within six calendar months from the date of the sale.

Maiden Heifer or recently served heifer –

- Within three calendar months from the date of the sale or
- Within one calendar month from the date when the heifer attains the age of twenty-eight months whichever is the later date.

Cow or heifer sold as being in-calf or as running with the bull and which proves not to be in-calf:

- Within twenty-eight days from the date of the sale.

### **Extending the breeding warranty**

If it is found impracticable to try the bull/female fairly within the time limits stated, due to the purchaser's normal calving programme, the purchaser shall (at the discretion of the vendor), **ON THE DAY OF THE SALE**, or within the next seven days, give the auctioneer notice **in writing** of the month in which it is proposed to commence using the bull/running the heifers with a bull.

### **LUING Performance recording initiative with Signet Breeding Services**

The Luing Cattle Society have recently announced their intention to provide all their members with free access to Signet's services. As part of this new initiative with Signet, the Luing Cattle Society will fund the recording costs of any paid up Society member; effectively removing the financial barrier that may have previously limited smaller herds from engaging in weight recording.

Data collection services for Luing breeders using Signet will move entirely online. Extra data has been provided by the Society to support this work – including the provision of pedigree records to strengthen the genetic evaluation and enhance Signet's cutting edge, inbreeding software.

To help with the marketing of bulls, breeders can generate charts and family trees online as before, but now they can also list cattle and semen that they have for sale and produce data in a catalogue format to interest prospective bull buyers.

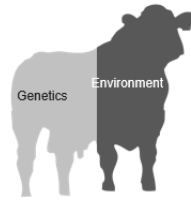

To see the Luing recording programme in action, go to [www.signetdata.com](http://www.signetdata.com)

If you would like to find out more about the scheme or to get involved, please contact [Laura.Eyles@ahdb.org.uk](mailto:Laura.Eyles@ahdb.org.uk) or phone 07973 701202.

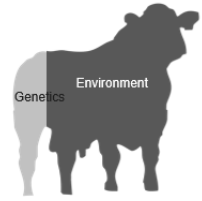

### **ESTIMATED BREEDING VALUES**

The pedigree and performance data collected on-farm is analysed using a procedure called BLUP (Best Linear Unbiased Predictor). This calculates how much of each animal's performance is due to its genetics and how much is attributed to the

environment in which it was reared. Genetic differences are expressed as Estimated Breeding Values (or EBVs).

High heritability traits like growth rate and mature size

Low heritability traits like fertility and calf survival

## How are EBVs calculated?

EBVs are only published for bulls from herds who have submitted weight records into Signets breeding evaluations.

Luigi Benchmark 2023							
EBV/Index	Bottom 5%	Bottom 10%	Bottom 25%	Breed Average	Top 25%	Top 10%	Top 5%
Birth weight	1.08	0.81	0.36	<b>-0.14</b>	-0.64	-1.10	-1.37
Calving Ease	-1.59	-1.23	-0.63	<b>0.05</b>	0.72	1.33	1.69
Calving Value	<b>0</b>	<b>1</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>4</b>
200 Day Growth	-8.11	-6.17	-2.94	<b>0.65</b>	4.24	7.47	9.41
400 Day Growth	-12.21	-9.08	-3.85	<b>1.97</b>	7.79	13.02	16.15
Muscle Depth	-1.15	-0.90	-0.48	<b>-0.01</b>	0.46	0.88	1.13
Fat Depth	-0.09	-0.07	-0.03	<b>0.01</b>	0.05	0.09	0.11
Beef Value	<b>3</b>	<b>4</b>	<b>7</b>	<b>9</b>	<b>11</b>	<b>14</b>	<b>15</b>
Maternal Value	<b>-6</b>	<b>-4</b>	<b>1</b>	<b>6</b>	<b>11</b>	<b>15</b>	<b>18</b>

EBV / Index	Explanation	Interpretation
<b>Birth Weight</b>	The genetic potential of calf birth weight. Negative values indicate cattle that will produce smaller calves. High values are more likely to be associated with difficult calvings	Negative values = lighter calves born
<b>Calving Ease (Direct)</b>	Estimates the percentage of unassisted calvings that will be derived when using a particular sire.	Positive values = more unassisted calvings
<b>200 Day Weight</b>	Genetic potential for growth to 200 days of age.	Positive values = faster growth rates
<b>400 Day Weight</b>	Genetic potential for growth to 400 days of age. Selection for faster growth will result in animals that have heavier carcasses at a constant fat class or leaner carcasses at a constant age. However, selection for higher growth rates may result in higher birthweights and mature size.	Positive values = faster growth rates
<b>Muscle Depth</b>	Selecting for this trait will increase the yield of lean meat in the carcase.	Positive values = deeper loin muscles
<b>Fat Depth</b>	Indicates animals capable of producing leaner carcasses, which can be taken to heavier carcase weights without becoming overfat.	Negative values = leaner carcasses

## Breeding Indexes

Whilst EBVs aid the selection of cattle for specific traits, they can be combined into breeding indexes using economic weightings to meet broader breeding objectives.

- **Calving Value** – Highlights bulls whose calves will be born easily
- **Beef Value** – Identifies superior cattle for growth and carcase traits
- **Maternal Value** – Indicates the best bulls for maternal traits, like milk production and longevity, which are important when breeding female replacements

## Accuracy values

An accuracy value is published with every EBV; they indicate how close an EBV is to the animal's true genetic merit. Accuracy values are influenced by the amount of data recorded for an animal and their relatives. Unrecorded cattle will have low accuracy values until their progeny have been performance recorded and this will be reflected in their EBVs.

# PEDIGREE LUING IN-CALF HEIFERS

## MR ANDREW MCNEE (BENHAR)

### LOT 1

**Benhar Bracklinn A15 P/55313 (UK562448/107157) Polled 13/03/2021 (Red)**

Walleys Marts  
Castle Douglas  
Ltd

**“The Premier Market for the Premier Breed”**

**FRIDAY 9<sup>TH</sup> FEBRUARY 2024**  
**FIFTY SEVENTH ANNUAL SHOW AND SALE OF**  
**REGISTERED Luing CATTLE**

held under the auspices of the Luing Cattle Society

Walleys Marts are delighted to host the 57<sup>th</sup> Annual Show and Sale of Luing Cattle. The Luing breed has established itself as one of the most prolific suckler cows available in today’s market. Therefore, a visit to Castle Douglas on the 9<sup>th</sup> February is essential to anyone looking to source top quality suckler replacement stock.

Last year’ sale saw 26 bulls sell to a top of 24,000gns and average £7,329, whilst 60 bulling heifers sold to 2,050gns and averaged £1,585gns, with 36 in-calf heifers topping at 3100gns and averaging £1,834gns
